New York, NY 10018
UI/UX Internship

To the Hiring Manager:

I am writing this letter to express my interest in your UI/UX Internship opportunity. I believe my skills in design will allow me to bring relevant contributions and fresh eyes to Braze.

I have experience working in teams such as student-run newspaper, Student Life, and product development team, Foodie. At Student Life I lead as Design Chief and was in charge of a small design staff and responsible for page layout with accompanying graphics or illustrations for our bi-weekly issues. At Foodie, I collaborated with students from UChicago to create spot UI elements for their dish rating app.

My knowledge of Adobe Creative Cloud and Sketch, understanding of wireframing, as well as design systems were pertinent to handle these jobs. Alongside this, having an educational background for Web Development and passion for communication design has given me the space to develop good HTML/CSS/JavaScript practices.

You may visit my portfolio at brandonwilburn.com to see examples of my work or email me at brandon.wil56@gmail.com for more information. Thank you for your time and consideration.
